

The APart CM5E is a modern and very competitive 5" built-in loudspeaker that is designed to fit into any interior and budget.

It is very suitable for the distribution of microphone calls and background music, and is definitely a winner for all your public tender projects.

This speaker has a 5" dual cone enforced paper woofer, a high quality ABS housing and a steel grill. The CM5E is easy to install thanks to its simple screwless mounting system with 2 hidden spring clamps at the back.

CM5E's standard color is white RAL9010, but from 12 pieces on, the loudspeaker can be painted on special request in any other RAL color.(REF:PAINTCM)
